

Please find below responsive data for **item E**.

As of October 13, 2021, the table below represents the number of UC who have entered ORR care since January 21, 2021, and tested positive for COVID-19, by month. The table includes data reported from ORR's licensed network and one operational influx care facility. All data are preliminary and may change as cases are investigated and as additional information is reported through ORR's web-based reporting system.

Note, the table below does not include COVID-19 cases reported from Emergency Intake Sites (EISs). As of October 13, 2021, a cumulative total of 11,126 COVID-19 cases among UC have been reported from EISs (ORR does not have an existing record of EIS COVID-19 case counts broke down by month).

MONTH	REPORTED CASES
2021-01	119
2021-02	673
2021-03	1974
2021-04	1850
2021-05	805
2021-06	1064
2021-07	2188
2021-08	2755
2021-09	2165
2021-10 (as of 10/13)	541
