Case No. FL-2023-00013

Reed Rubinstein America First Legal Foundation 611 Pennsylvania Avenue, SE, #231 Washington, DC 20003

Dear Mr. Rubinstein:

As we noted in our letter dated October 31, 2023, we are processing your request for material under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552. The Department of State ("Department") has identified one additional responsive record subject to the FOIA. Upon review, we have determined that the record may be released in part.

An enclosure explains the FOIA exemptions and other grounds for withholding material. Where we have made redactions, the applicable FOIA exemptions are marked on each record. Where applicable, the Department has considered the foreseeable harm standard when reviewing these records and applying FOIA exemptions. All non-exempt material that is reasonably segregable from the exempt material has been released and is enclosed.

We will keep you informed as your case progresses. If you have any questions, your attorney may contact Pardis Gheibi, U.S. Department of Justice Trial Attorney, at pardis.gheibi@usdoj.gov and (202) 305-3246. Please refer to the case number, FL-2023-00013, and the civil action

Subject: Response to Taken Questions	-

## Hi Matt,

Following up on the conversation last week, below are GEC's responses to the two taken questions.

These responses are provided on deep background.

# Q1. How are people getting to these sites? Google? Etc

The majority of users accessing these four sites go to the site directly. For greater context, we have outlined the traffic for each of the four sites below. This data captures traffic for the full month of September from SimilarWeb, a publicly available tool.

## **Definitions:**

**Direct traffic** occurs when a visitor arrives directly on a website by typing in the website's URL, without having clicked on a link on another site or using a search engine.

**Referral traffic** describes the people who come to a domain from other sites, without using a search engine.

**Search traffic** refers to the visitors who arrive at a website by clicking search results leading to that particular website (mostly after searching keywords or phrases).

Social traffic is traffic from social media outlets.

- NEO: 79% direct traffic; 8.5% referral traffic (mostly from other alternative media); 7.7% traffic from search; 3.7% social traffic (43.6% from Facebook)
- Oriental Review: 55.5% direct traffic; 13.3% referral traffic (83% from news aggregator Inoreader); 21.4% from search traffic; 9.7% social traffic (56% from Twitter)
- News Front: 63.9% direct traffic; 13.5% referral traffic (33% from Russian search engine Yandex; other traffic from news aggregators and websites); 5.9% from search traffic; 9.8% social traffic (56.8% VKontakte)
- Rebel Inside: Not available on SimilarWeb.

# Q2. Are we seeing lots of Spanish speaking audiences targeted from these sites?

News Front is the only one of the four entities we outlined that directly targets Spanish speaking audiences. News Front has a dedicated Spanish-language proxy site and claims that the site's editorial branch is based in Spain. In addition, we see that News Front targets Spanish speaking audiences on the Russian social media platform VKontakte. The page self identifies as being located in Madrid, Spain and has 1,633 followers. News Front's Spanish-language no longer has any pages on Twitter, Facebook and YouTube because they all have been suspended by the platforms.

Happy to discuss any proposal to move something to "on background." Finally, could you give some idea about when you are looking to publish? Best,

J.T.
